CUTOMER RETENTION AND CHURN ANALYSIS FOR A TELCO COMPANY

Dashboard insights

Author: Prudence Tlou

Tools used: MySQL and Power BI

Date: 19 March 2026

Project overview

This project analyses customer churn for a telecommunications company using real-world subscription data. The goal is to help business teams understand why customers leave, which segments are most at risk, and what actions can improve customer retention.

This type of analysis is core to SaaS, fintech, and subscription-based businesses where reducing churn directly improves revenue and growth.

Key Findings

- Overall churn rate is 26.58% - higher than industry average
- Month-to-month contracts churn at 42.71%
- Fiber Optic customers churn at 41.89%
- Electronic check payment churn at 45.29%
- Senior Citizens churn 41.68%
- New customers (0-12 months) churn at 47.68%
- The cohort that pays the high monthly fee ($61-$90) churn at 34.44%

Business Recommendation

- Convert month-to-month customers to longer contracts
- Investigate fiber optic service quality and pricing
- Incentivize automatic payment methods
- Create special plans for senior citizens
- Improve onboarding for new customers
